8000-002-001-004	3. Vertical Solar Panel In the midst of disaster, electric power is often the first to go. Within minutes, the loss of this critical service can result in widespread panic when houses and businesses become abruptly dark, gasoline can't be pumped to fuel emergency vehicles, and communication with loved ones is limited. This project is in preparation during a disaster by providing a fast and temporary power supply and also this may help reduce the expenses in electric consumption every month and this may produce clean electricity to meet the demand of the Barangay by constructing a Vertical Solar Panel at Barangay Multi-Purpose Hall, for Bel-Air III Multi-Purpose Covered Court	4,000,000.00	January to December	100% installation of vertical solar panel
8000-003-000	BEL-AIR STREET LIGHTING PROGRAM			
8000-003-001-000	Smart Solar Lighting and Energy Hub Project			
8000-003-001-001	1. LED and Solar Streetlight Modernization This activity promotes community security and safety for drivers, riders, residents, and commuters by removing outdated lamp posts and upgrading to modern LED streetlights. The installation of sustainable, solar-powered lighting systems supports accessibility, environmental resilience, and the barangay's transition toward clean and innovative energy practices. The initiative covers key areas in Bel-Air Village and Salcedo Village including Jupiter Street, Malugay Street, and Nicanor Garcia Street, ensuring safer and well-lit roadways within the barangay.	1,400,000.00	January to December	100 % completion of streetlights within Barangay Bel-Air Village and Salcedo Village
	Total	10,345,671.60		

We hereby certify that the information presented above are true and correct.
